

HARTMANN

# Continence Management Catalogue

# MoliCare®

HARTMANN has been providing healthcare products for over 200 years and incontinence products for over 50 years. We take a holistic approach to healthcare, placing emphasis on the tangible benefits for patients and those who care for them, aiming to enhance their well-being.

## The MoliCare® Difference

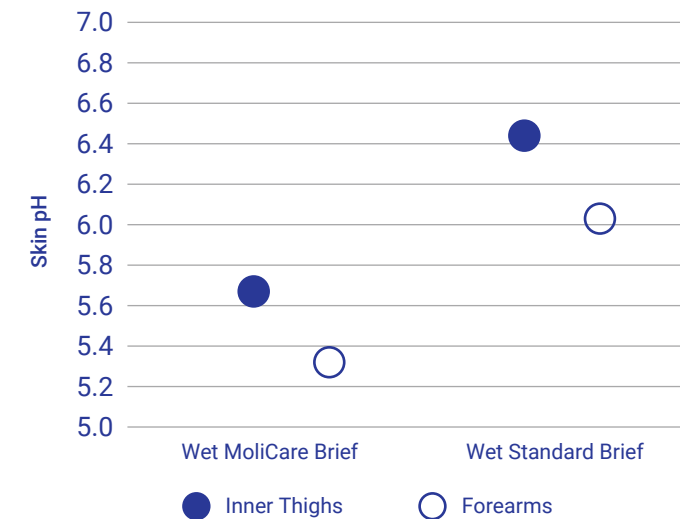

MoliCare is dedicated to meeting the most stringent standards of quality, dependability, and effectiveness by utilising our advanced technology to develop innovative solutions for managing incontinence. The aim is to address the needs of individuals living with incontinence, enhance the daily duties of skilled caregivers, and satisfy the expectations of healthcare professionals.

Incontinence can disrupt the skin's natural barrier and acid protection mantle, leaving it more susceptible to irritation and damage from urine and faeces.<sup>1</sup> In order to prevent Incontinence Associated Dermatitis (IAD), which can cause skin inflammation, blisters, itchiness or skin erosion<sup>2-4</sup>, it is important to take measures to protect the skin from the harmful effects of incontinence.

MoliCare provides absorbent products that are specifically designed to keep the skin dry and maintain its acid protection layer. This can help alleviate the negative consequences of stress factors associated with incontinence and prevent the development of IAD. This is in line with expert recommendations, which emphasises the importance of preventing IAD as a means of improving quality of life for individuals living with incontinence.<sup>5</sup>

### pH of Skin on Incontinence Briefs<sup>6</sup>

### MoliCare Absorbent Products:

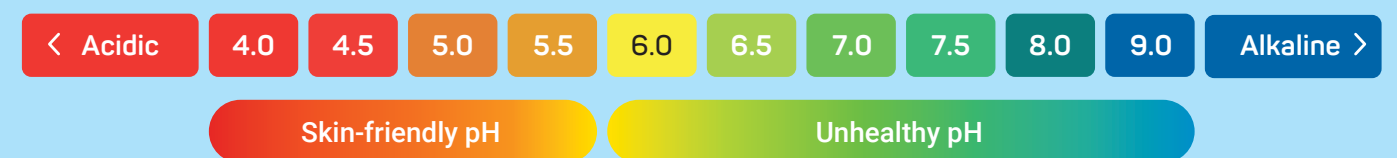

- Significantly lower skin pH values compared to standard briefs, when skin is exposed to alkaline solution.<sup>6,7</sup>
- Lower the prevalence of erythema<sup>6,7</sup> which is skin redness, an early sign of skin irritation.

Graph data from Bliss Study Absorbent Briefs Containing Curly Fiber Lower (Acidify) Skin pH Reducing Risk for Incontinence Associated Skin Damage in Older Nursing Home Residents.<sup>6</sup> ANOVA F=8.83 for thigh and F=10.12 for forearm pH differences, p < .001 for both; in post-hoc comparisons, skin pH values after wet brief using MoliCare are lower than all other conditions (p=.001 for all).<sup>6</sup>

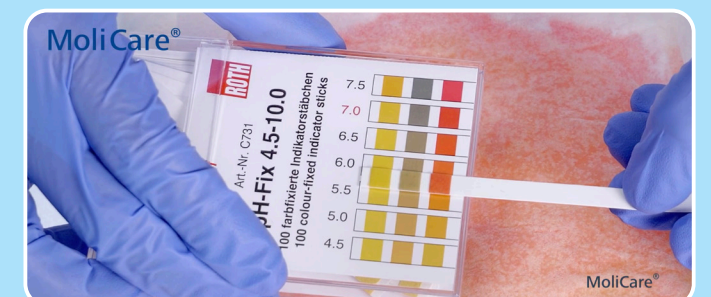

- MoliCare controls odour and promotes a healthy skin environment.

- Buffers urine to a skin-friendly pH
- Maintains a skin-healthy pH balance
- Preserves the acid protection mantle
- Facilitates rapid fluid distribution within the brief
- Keeps the skin feeling dry

## The MoliCare® Skintegrity System

MoliCare offers a comprehensive approach to incontinence management by combining MoliCare absorbent products with MoliCare Skin products.

This combination, known as the MoliCare Skintegrity System, helps to maintain a healthy skin pH balance and helps prevent the occurrence of Incontinence Associated Dermatitis (IAD).

MoliCare absorbent products work in conjunction with MoliCare Skin care products to maintain the acid protection mantle and provide a skin-neutral pH balance.\*

Our goal is to provide innovative solutions that improve the management of incontinence, allowing individuals to live with greater comfort and dignity.

## Health Economics of MoliCare

### Incidence

In an acute care study of 5,432 patients<sup>1</sup>:

- 45.7% of patients had a prevalence of IAD
- 73% of IAD patients developed IAD following admission

IAD accompanied by unrelieved pressure results in a **5-fold increase** in pressure injury risk<sup>2</sup>

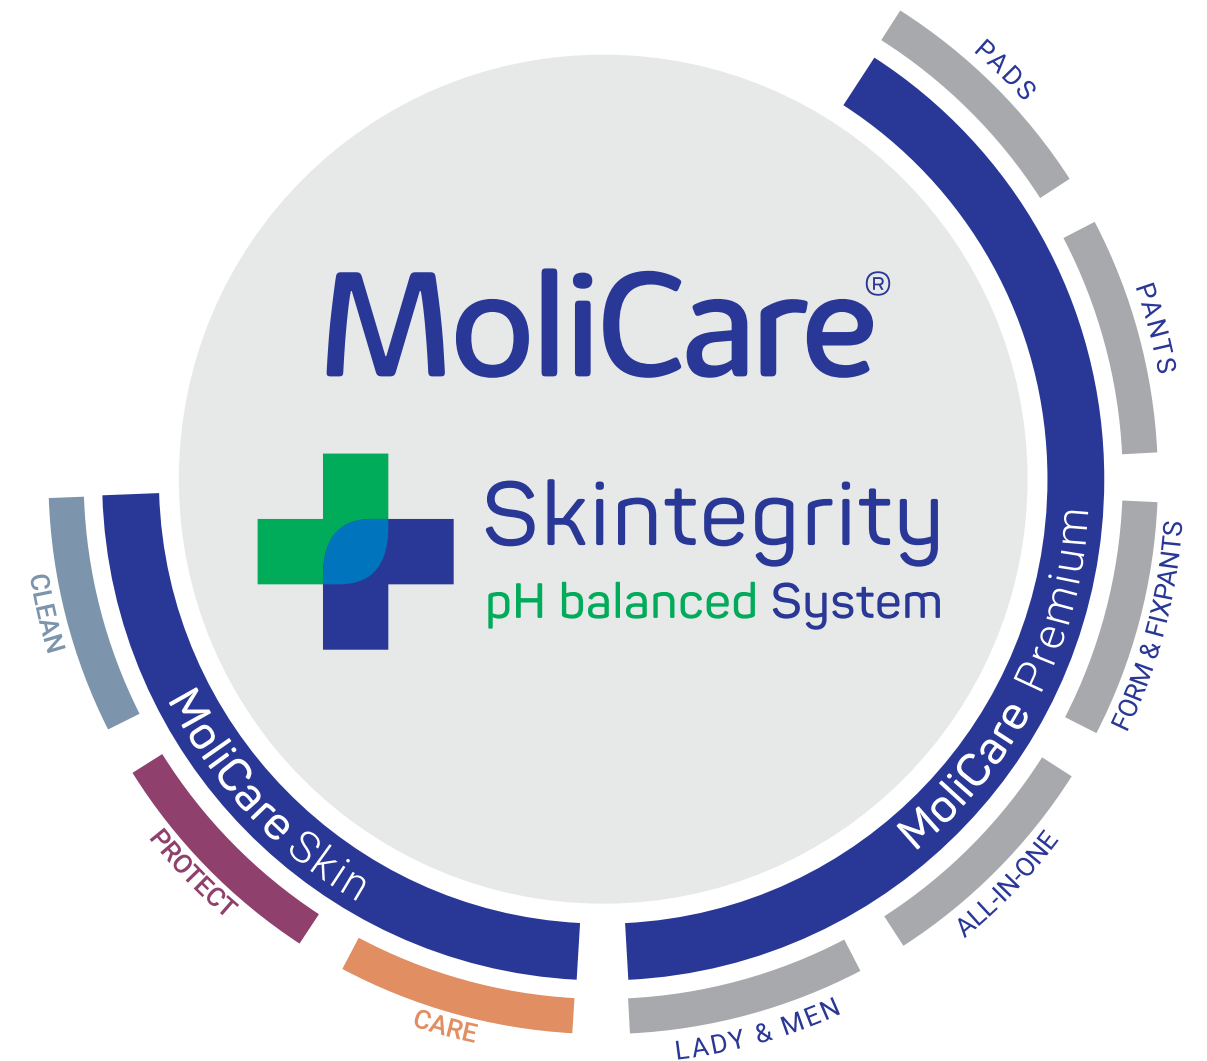

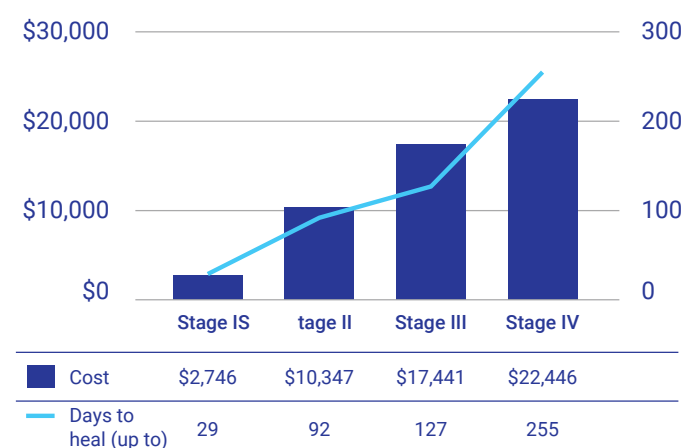

### Cost - IAD<sup>1</sup>

The average cost to treat one mild to moderate IAD episode in one resident is \$220.

**IAD occurrence can be up to 52%, resulting in costs of \$3,294 per month.**

(This example assumes 20% in a 100 bed long term care facility with 75% incontinence at April 2018 rate<sup>1</sup>)

### Cost - Pressure Injuries<sup>2,3</sup>

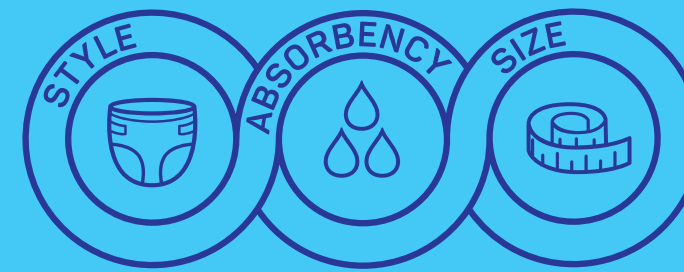

1. Gray, M., Giuliano, K.K., JWOCN, Incontinence Associated Dermatitis, Characteristics and Relationship to Pressure Injury A Multisite Epidemiologic Analysis, January/February 2018. 2. Melter, Pressure Ulcer Assessment and Treatment; Wild Iris Medical Education 2014; 17. 3. Bliss et al., An economic evaluation of four skin damage prevention regimens in nursing home residents with incontinence; economics of skin damage prevention; J Wound Ostomy Continence Nurse. 2007;34(2): 143-152.

\*Except MoliCare® Premium Men Pad 3 Drops, MoliCare® Skin Body Lotion, MoliCare® Hand Cream, MoliCare® Protection Foam

# 3 easy steps

## to select the right continence aid

## STYLE

Multiple styles to meet diverse needs

- ✓ Select a style based on the level of mobility.

### Active

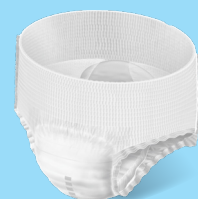

Style based on personal preference.

MoliCare Premium Pads and Pants

### Active with restricted mobility and/or cognitive difficulties (e.g. Dementia)

Pull-up recommended - looks and feels like regular underwear.

MoliCare Premium Mobile

### Restricted/supported mobility or bedbound

All-in-one product recommended - easiest option for carers.

MoliCare Premium Elastic, Form and Fixpant

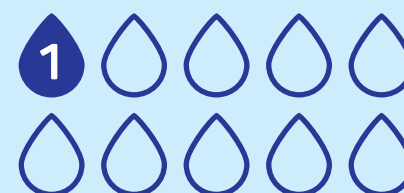

## ABSORBENCY

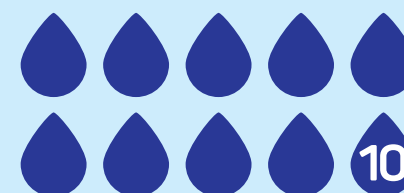

Stay dry with the right absorption level

- ✓ Select an absorbency that matches the level of incontinence.
- ✓ Look for the drop rating on the pack.

Less Absorbent

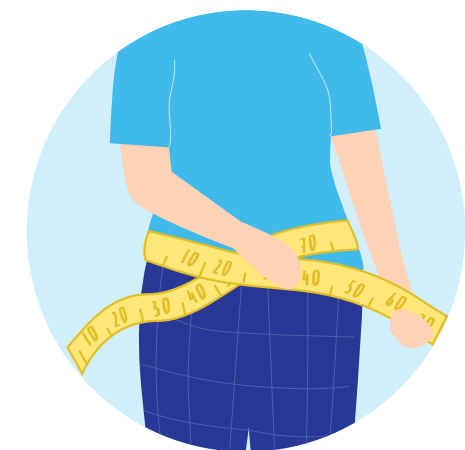

More Absorbent

## SIZE

For optimal comfort and leakage protection

- ✓ Measure around the widest part between waist and hips.

- ✓ Select the product size based on the pack's size guide.
- ✓ Leakage may occur if the product is too large or too small.

Due to different cuts, shapes and sizes of the absorbent core in each product group, the exact absorption level differs within each drop level, (i.e. 1 drop does not equal a defined ISO absorbency). For the exact absorbency measures, refer to specific product information throughout the catalogue. Colours correspond to colour coding of packaging.

# MoliCare® Fitting Guide

## Find the right fit

Due to different cuts, shapes and fixation systems, different product categories follow different sizing guides. Measure waist at the largest width between the waist and hips and select the product size based on the size guide printed on the product packaging or below.

# MoliCare® Advanced Features

## Appendix

**Active skin protection**  
Skin-friendly, pH balanced ensures maximum skin compatibility. Keeps skin dry with a 3-layer absorbent core and advanced fast dry effect.

**Odour neutralisation**  
Neutralises unpleasant odours for enhanced well-being.

**Dermatologically tested**  
Helps to maintain healthy skin.

**Adjusted fit**  
Safety and comfort through optimal fit; elasticised side panels ensure better adaptation to body shape and movements, delivering improved comfort.

**Advanced skin protection**  
Thanks to a balanced pH.

**Anti-leakage system**  
Fast absorption with anti-leakage system and cuffs for extra security.

**Absorption system**  
Providing extra protection.

**All-round protection**  
Provided by fast absorption, anti-leakage system and odour neutraliser.

**Anatomical fit extra for men**  
Extra protection in the front where men need it most.

**Air active skin protection**  
Active Skin Protection features for optimum skin conditions and wearing comfort.

**Comfortable fit**  
High wearing comfort and ideal fit to body.

**Dermatologically tested**  
Helps to maintain healthy skin.

**Discreet**  
Continence underwear with a low waistline, designed to fit and feel like regular underwear.  
  
MEN with lower waistline and grey tint, fits and feels like regular underwear.

**Discreet underwear feeling**  
Underwear-like fixation pants made of high-quality soft and close material.

**Elasticated side panels**  
Elasticised side panels in the hip area ensure better adaptation to body shape and movements, delivering improved comfort for the user.

**Ergonomic and easy use**  
Approximately 20% faster application as well as easier and more ergonomic handling for caregivers.<sup>1</sup>

**Extra protection**  
Absorbs liquid and provides extra protection for various surfaces.

**Extra odour neutralisation**  
Superabsorbent polymers neutralise unpleasant odours.

**Feels dry & comfortable**  
Up to 64% faster urine absorption compared to the previous MoliCare Premium Form.

**Hypoallergenic & dermatologically tested**  
The materials used have extremely low potential to trigger allergic reactions.

**Hygienic care**  
Single-use secure protection.

**Prefolded & compressed**  
For easy use and storage.

**Quick dry system**  
Absorbent core holds liquid quickly for a dry feeling.

**Re-closable tapes**  
2 re-closable tapes (one for each side) for easy and secure closing.

**Secure fixation**  
Designed to be worn with regular underwear.

**Secure fixation**  
Secure fixation of anatomically shaped incontinence pads.

**Soft**  
Soft textile-like back sheet provides comfortable feeling.

**Soft & skin friendly**

**Skin friendly**  
Soft, breathable material for healthy skin

**Tumble dry at low heat**

**Wetness indicator on the back sheet**  
Shows when it is time to change.

**3-layer absorbent core**  
Improved absorption core technology that helps to prevent skin irritations.

**50x washable**  
Washable up to 50 times at 60°C in a laundry net.

1. W. Schneider, H. Mutschler, R. Haller, C. le Mathe: Test for ergonomic evaluation of incontinence products, Oct 5-8, 2015 Dijon. The reduction from 4 to 2 tapes (one for each side) combined with no side panels in the front simplifies the application by reducing the steps from 8 to 4 compared to a traditional slip with 4 side panels and 4 tapes. Additionally, due to the elasticated side panels, there is less need of readjusting the tapes.

Helps. Cares. Protects.
