ENTERAL

# Vygon in the world

#### **OUR STORY**

Pierre Simonet founded Vygon in France in 1962. He was one of the first to introduce the concept of disposable medical equipment. Shortly thereafter, the company established subsidiaries in Europe, the United States, India, South America, and more. Today it is present worldwide. Vygon also relies on many production units, starting with its first plant in France and continuing on to its latest, brand-new plant that opened in Portugal in 2015.

Vygon is changing for you

Today the company is present in 100 countries and works for 4,000 clients worldwide. We owe this rapid expansion to all of our clients, both old and new, and to our employees' capacity for innovation. Thanks to their commitment, we are able to offer the products and devices that healthcare professionals expect, and that provide their patients with relief. We are also grateful for all of our employees' positive attitudes, whether they work in our laboratories, in our plants, or in our subsidiaries. Everyone is devoted to their jobs in the service of healthcare.

Today, our development and our results have led us to prioritise an even more efficient approach for project management and to structure our activity in five business units. Since our product range is managed in a decentralised fashion, our staff members are able to concentrate on more specific projects, shorten the innovation cycles, and be more responsive in managing their relations with you.

Retaining the values, vocation, and professional approach that are unique to Vygon, and intensifying our inventive spirit, are the very objectives of this new organisational structure.

Stéphane Regnault CEO

3

# Vygon offers a safe and secure enteral feeding system for every patient

In the 2000's, the International Organisation for Standardisation (ISO) decided to mitigate the likelihood of tubing misconnections and create the ISO 80369 series in order to increase patient safety by specifying designs of non-interconnectable connectors for liquids and gases used in healthcare applications (respiratory, enteral, urology, limb cuff inflation, neuraxial, and I.V).

In order to get the technical and market expertise, ISO encouraged industry to be part of the working groups. That is why Vygon, with 20 years of experience in safety enteral feeding systems, joined the ISO 80369 Committee from the beginning.

In July 2016, the International Organisation for Standardisation published the ISO 80369-3 standard, which defines a standardised safety enteral feeding connection. As with <code>nutrisafe2</code>, this new enteral connection, named <code>ENFit<sup>TM</sup></code>, prevents the risk of misconnections (e.g. inject milk in the intravenous line) by its specific non-interconnectable design.

Patient safety, along with high quality care, is at the top of Vygon's priorities for all populations. That is why Vygon goes further than the ISO 80369 standard by proposing not only an  $ENFit^{TM}$  range, but also a dedicated safety enteral range for neonates and newborns.

#### nutrifit®, a comprehensive ENFit™ product range

- Compliant with ISO 80369-3: nutrifit® incorporates the standardised safety enteral connector.
- **Specific:** only dedicated to enteral application, nutri**fit**® prevents misconnection with other clinical applications (respiratory, I.V., etc.).
- Secure: with its twist design, nutrifit® avoids accidental disconnections.
- Universal: nutrifit® can be connected to any ENFit™ system worldwide.

# nutrisafe2, a safety enteral product range dedicated to neonates and newborns

Due to the neonatal patient's tiny size, they require special care with dedicated medical devices. Therefore, Vygon decided to maintain nutrisafe2 for them:

- Safe: Compliant with ISO 80369-1, nutrisafe2 incorporates a specific safety enteral connector, which was assessed to prevent misconnection risks with other clinical applications (respiratory, I.V., etc.) in line with the ISO 80369 general requirements.
- **Small:** Specially designed for preterm infants, nutri**safe**2 compact design minimises the size, weight and dead space of the connection.
- Accurate: Thanks to its compact design, nutrisafe2 ensures high accuracy in drug administration in very low volumes and reduces the overdosing risk by a factor of 4 when compared to ENFit™ or Low Dose Tip (LDT) connections.
- More than 10 years of experience in neonatology: Vygon took on board customer feedback to continuously improve its nutrisafe2 range for neonatal use and validated its safety aspect.

# Enteral feeding pumps

#### easylit range

easylit is a range of enteral feeding pumps, designed for stationary use, ideal for overnight feeding, hospitalised patients and elderly people.

#### Two models are available:

Pumps and sets

easylit4: the stationary pump which only requires flow rate programming.

easylit6: the all inclusive stationary pump when flow rate and volume programming are needed.

#### Features & benefits:

- Intuitive and easy to use: short learning curve
- Powerful: the rotary peristaltic motor helps delivering high viscosity food without any obstruction
- Quiet: the continuous rotary peristaltic system avoids repetitive start and stop noises
- Safe: visual and audible alarms, calibrated to avoid untimely alarms due to overpressure (in case of cough, brief kinkings, etc.).

- Weight: 1400gr (3.08lb)
- Flowrate: 1 600ml/h in 1ml increment
- Battery: Ni-MH
- Battery autonomy: 7h at 125ml/h
- Selfpriming

#### **OVEPL4**

easy**lit**4 stationary pump

- Weight: 1400gr (3.08lb)
- Flowrate: 1 600ml/h in 1ml increment
- Volume: 1 to 9999ml in 1ml increment
- Battery: Ni-MH
- Battery autonomy: 7h at 125ml/h
- Selfpriming

#### **OVEPL6**

easy**lit**6 stationary pump

nutri**safe**2 FOR NEONATES

# Feeding sets for pumps

#### easy**moov**6

easy**moov**6 is an enteral feeding pump, designed to meet all ambulatory patient needs thanks to its innovative design and ergonomic shape.

The new @asy**moov**6 ambulatory pump is also suitable for stationary use thanks to its 180 degree pole clamp. This pump offers comfort for patients and medical professionals to meet all their needs in hospital and homecare.

Intuitive and available in 8 languages, this new pump has a large screen showing useful and relevant information during feeding such as flow rate, volume, time left before the end of the feeding and total volume already administered.

A Menu option is also available, allowing patients, caregivers or medical professionals to change the pump settings, to set two different nutrition modes and to see the pump data without any software.

#### Features & benefits:

- Intuitive and easy to use: short learning curve.
   All the information is available in a large screen, allowing the user to manage it quickly
- Powerful: the rotary peristaltic motor helps delivering high viscosity food without any obstruction, guaranteeing silent and constant flowrate throughout the feeding
- Quiet: the continuous rotary peristaltic system avoids repetitive start and stop noises allowing patient feeding during the night without being disturbed
- Safe: visual and audible alarms, calibrated to avoid untimely alarms due to overpressure (in case of cough, brief kinkings, etc.).

- Weight: 650gr (with battery)
- Flowrate: 1 400ml/h in 1ml increment
- Volume: 1 to 9999ml in 1ml increment
- Battery: Ni-MH
- Battery autonomy: 20h at 125ml/h
- Selfpriming

#### **OVEPM6**

easymoov6 ambulatory pump

## A full range of feeding sets designed to cover all healthcare professionals' requirements and to improve patient safety and comfort.

The range includes feeding sets with or without bag, single or double lines and double line with one line dedicated to hydration and fitted with a non-return valve.

The range is designed with the safest components available ensuring the safest delivery of nutrition:

#### Proximal end

Fitted with the enteral safety bag connector compatible with ENPlus bags to prevent any risk of misconnection with parenteral nutrition bags.

#### Lateral port

Fitted with the safe ENFit™ or nutrisafe2 connector compatible with ENFit™ or nutrisafe2 syringes.

#### Distal end

Includes an ENFit™ or nutri**safe**2 connector with a removable christmas tree adaptor.

#### easylit range feeding pump sets

This range of feeding pump sets is compatible with easy **lit** pumps and also with P7000, Compat, Flocare 800 pumps. Feeding pump sets fitted with a non-return valve are dedicated to hydration.

# nutrisafe2

The safe enteral feeding system for neonates

#### **PVC** feeding tubes

Especially designed for neonatal patients and newborns, the PVC nutrisafe2 feeding tubes are intended to be used for short-term (up to 5 days) and feature the following characteristics:

- Made of PVC
- Closed distal tip with 2 lateral eyes
- Small cap with colour code to quickly identify the size of the tube
- Numerical markings every centimetre:
  - from 5cm to 35cm for codes 364, 361 & 363
  - from 5cm to 70cm for code 362
- Radiopaque
- Transparent to better visualize the administered solution.

	Tube					Colour	Quantity

# Polyurethane feeding tubes

#### Without stylet

Designed for neonatal patients and newborns, the PUR nutrisafe2 feeding tubes are intended to be used for medium-term (1 to 4 weeks) and feature the following characteristics:

- Made of PUR
- Closed distal tip with 2 lateral eyes
- Small cap with colour code to quickly identify the size

• Numerical markings every centimetre:

- from 5cm to 35cm for codes 1364, 1361 & 1363

- from 5cm to 70cm for codes 1362 & 1365
- Radiopaque
- Transparent to better visualize the administered solution.

#### With stylet

Designed for neonatal patients and newborns, the PUR nutrisafe2 feeding tubes are intended to be used for medium-term (1 to 4 weeks) and feature the following characteristics:

- Made of PUR
- Stylet protected by a ball end to facilitate the placement
- Closed or open distal tip with 2 lateral eyes
- Small cap with colour code to quickly identify the size
- Numerical markings every centimetre:
  - from 5cm to 35cm for code 1363
  - from 5cm to 70cm for code 1362

		Tube		D: . 1 .:		Quantity

For other sizes, please contact your Vygon representative.

### Gastroscopy set

Designed for paediatrics and adults use, this PUR nutrisafe2 feeding tube is placed with a gastroscope. It is intended to be used for medium-term (1 to 4 weeks) and features the following characteristics:

- Made of PUR
- Closed distal tip with 4 lateral eyes
- No numerical marking as the length is adjustable
- - a male nutrisafe 2 collar and a nutrisafe 2 hub with metallic tubing + female cap
  - a female nutrisafe2 / large funnel connector to connect a large bore syringe
- Radiopaque.

Code	Tu	be	Colour	Quantity

#### Silicone feeding tubes

#### Without weighted tip

Designed for neonatal patients and newborns, the silicone gastro-duodenal nutrisafe2 feeding tubes are intended to be used up to 4 weeks and feature the following characteristics:

- Made of silicone
- Closed distal tip with 2 lateral eyes
- Small cap with colour code to quickly identify the size
- Numerical markings every centimetre:
  - from 5cm to 35cm for code 2331
  - from 5cm to 70cm for code 2332
- Radiopaque
- Transparent to visualize the administered solution.

2332.082	125	8	2.34	Blue	10/240

For other sizes, please contact your Vygon representative.

#### Silicone feeding tubes

#### With weighted tip

Designed for neonatal patients and newborns, the silicone gastro-duodenal nutrisafe2 feeding tubes with weighted tip are intended to be used up to 4 weeks and feature the following characteristics:

- Made of silicone
- Weighted tip with metallic olive
- Closed distal tip with 2 lateral eyes
- Small cap with colour code to quickly identify the size
- Numerical markings every centimetre from 5cm to 70cm
- Transparent to visualize the administered solution.

		Tube					Quantity

#### Dual flow gastric tube

Gastric aspiration

Dual flow gastric tube for continuous gastric aspiration with nutrisafe2 connection:

- The main channel is fitted with a removable taper connector (code 368.12)
- The extension tube of the secondary channel ends with a male nutrisafe2 hub
- Closed distal tip with 6 lateral eyes
- Numerical markings every centimetre from 5cm to 45cm
- The product is also supplied with a straight double taper connector
- Length: 60 cm

#### **Gastric aspirator**

Gastric aspirator with:

- a collection trap volume 25ml
- a cap ensuring a tight seal of the specimen sampling
- a tube connecting the device to the suction source with funnel connector
- a tube with female nutrisafe2 hub to connect to the nutri**safe**2 feeding tube.

Code 534.082 Quantity box/case: 10/60

#### **Transparent syringes**

The transparent nutri**safe**2 syringes incorporate a purple-coloured plunger and "Enteral" print, enabling instant identification for enteral use. Sterile and individually packed.

#### Re-usable syringes

The nutrisafe2 reusable syringes have been specifically designed for homecare enteral nutrition and medication. The syringes incorporate a purple-coloured plunger and "Enteral" print, enabling instant identification for enteral use.

nutrisafe2 FOR NEONATES

nutrisafe2 syringe trays are indicated for the daily preparation of the enteral nutrition for an individual patient. Each tray can contain syringes, lockable caps and sampling device.

The product benefits are:

- time and money saving, by reducing preparation time, improving stock management and decreasing waste
- improved patient safety, by simplifying the procedure, allowing traceability with label placement
- designed for neonates and newborns, with chosen and adapted

Syringes supplied in a transparent tray:

#### **Extension tubes**

#### Standard extension tubes

These nutrisafe2 extension tubes keep the feeding tube away from the syringe driver to improve patient's comfort and avoid tube dislodgement.

- Purple-coloured PVC extension tube
- Standard bore for standard milk formula or large bore for fortified milk
- Attached cap to close the tube and avoid contamination.

		Quantity			
Code	Length cm	Ext. Ø mm	Int. Ø mm	Prim. vol. ml	Box/case
368.032	30	2.5	1.5	0.66	50/300

#### Extension tubes with lateral port

These nutrisafe2 extension tubes are designed with:

- Funnel proximal end
- Roberts clamp on the proximal section to interrupt the administration of enteral feed while the medication is injected in the lateral port
- Lateral port with male nutrisafe2 connection and attached cap
- Distal end with female nutrisafe2 connection (code 339.0172)
- Distal end with female nutrisafe2 connection and removable Christmas tree adaptor (code 339.0182).

5307.2106	60	4.2	3	4.6	Curved to 90°	10/120	

#### Extension tube with taper connector

This extension tube with taper connector and female nutrisafe2 hub allows the connection of a nutrisafe2 feeding tube to a suction device for stomach decompression:

- Made of PVC
- Purple-coloured to easily identify the line as an enteral line
- 25cm long.

Code:368.32

Quantity box/case: 25/300

#### Syringe accessories

#### Vented caps

Vented cap are used for nutrisafe2 syringes (20 and 60ml) to enable gravity feeding and protecting the solution of enteral feed from contamination.

Code	nutri <b>safe</b> 2 <b>syringe</b>	Syringe capacity	Quantity
Code	Туре	Volume	Box/case
818.22	C-GON	For 20ml syringes	50/400

Code	Packaging	Quantity (box/case)
828.01	Individually packed	100/4800
828.08	Pack containing 8 caps	100/1800

#### Holder for nutrisafe2 syringes

Designed to hold 20ml and 60ml nutrisafe2 syringes in vertical position for gravity feeding. Easy screw fixation, for attachment to any vertical bar.

Code 367.011 Quantity box/case: 5/120

#### Sampling devices

#### **Drawing-up straws**

The nutri**safe**2 drawing-up straw is a device connected to a nutrisafe2 syringe for medication sampling (code 817.052) or to fill the syringe with milk / milk formula (other codes).

		Drawing-up straw					
Code	Length cm	Int. Ø mm	Ext.Ø mm	Prim. vol. ml	Box/case		
817.052	5	1.2	2.0	0.11	100/1800

817.502	50	2.0	3.3	1.6	20/240		

#### Drawing-up straw with filter

This drawing-up straw device incorporates:
• A male nutrisafe2 connector

- A 5µm filter.

		Quantity		
Code	Length cm	Ext.Ø mm	Int.Ø mm	Box/case
817.105	10	2.5	1.5	50/900

This needle is designed to aspirate medications from an ampoule to administer the medication orally, via a feeding tube or via a gastrostomy device.

Features:

- Male nutrisafe2 connector
- No filter
- Length: 52 mm
- External diameter: 1.1mm.

Code 817.002

Quantity box/case: 100/1800

#### Lockable bottle cap for sampling

These nutrisafe2 caps can be used with a large variety of vials to replace the original cap.

Once the cap is in place, the contents can only be removed with a nutri**safe**2 syringe for enteral use.

Non sterile.

	Сар	Quantity
Code	Ø mm	Box/case
820.18	18	20/1920
820.20	20	20/1920
820.22	22	20/1920
820.28	28	20/1920

#### Needleless vial access cap

These devices are designed to perforate vials sealed by a rubber cap. The contents of the vial can then be aspirated using a nutrisafe2 syringe. After sampling, the vial can be stored with the nutrisafe2 access cap in place with its attached closing cap. Hence, it is secured against accidental access with a standard syringe or hypodermic needle.

	Compatibility	Quantity
Code	Vial Ø mm	Box/case
821.012	14	50/400
821.022	20	25/200

#### nutrisafe2 spike

Connected to a nutrisafe2 syringe, this device allows medication samplings from vials with a rubber cap. The spike features at the proximal end a male nutrisafe2 connection with cap.

	Sp	Quantity	
Code	Length mm	Prim. vol. ml	Box/case
281.062	31.5	0.51	10/240

#### Other accessories

#### Cap for nutrisafe2 feeding tubes

Purple-coloured obturator cap for nutrisafe2 feeding tubes. Individually packed.

Code 829.01

Quantity box/case: 100/4800

#### nutrisafe2 - ENFit adaptor

The nutrisafe2 - ENFit<sup>TM</sup> adaptor is indicated for enteral use only. It enables the connection between a female ENFit<sup>TM</sup> connector (e.g. distal end of an ENFit<sup>TM</sup> administration pump set) and a male nutrisafe2 connector (e.g. a nutrisafe2 feeding tube). Priming volume: 0.10ml

Code 368.72

Quantity box/case: 100/1800

#### **ENFit** - nutrisafe2 adaptor

The ENFit<sup>TM</sup> - nutrisafe2 adaptor is indicated for enteral use only. It enables the connection between a female nutrisafe2 connector (e.g. nutrisafe2 syringe) and a male ENFit<sup>TM</sup> connector (e.g. a nutrifit feeding tube). Priming volume : 0.25 ml

Code 0VEACC510
Quantity units/box: 300/box

#### griplok® securement device

Designed to secure enteral feeding tubes (and nasal cannulae), this device features :

- Fixation with hydrocolloïd adhesive
- grip**lok**® technology that allows re-opening in order to get access to the tube to be cleaned or repositioned.

The griplok® securement device can be cut in half in order to reduce its size and adapt it to the patient's size.

Code 5804.11

Quantity box/case: 50/1000

#### 3-way stopcock

The 3-way stopcocks allow delivering medication without disconnecting feed. They incorporate a female nutrisafe 2 port to connect to nutrisafe 2 feeding tubes and 2 male ports.

Code 5802.02 is chemically more resistant.

Code	Stop	cock	Prim. vol.	Quantity
Code	Tested at bar	Material	ml	Box/case
5802.01	10	Polycarbonate	0.26	50/300
5802.02	-	Polyamide	0.26	50/300

#### Syringe-syringe transfer device

Connector to transfer medications contained in a nutrisafe2 syringe into another, without need for intermediary or another container.

Code 368.22

Quantity box/case: 30/2880

#### Feed set adaptor

Adaptor to connect pump administration sets to nutrisafe2 feeding tubes.

Code 368.02

Quantity box/case: 30/2880

#### Taper connector

Taper connector with nutrisafe2 male connection to administer medications with a nutrisafe2 syringe into a gastrostomy device.

Code 368.12

Quantity box/case: 30/2880

#### **Y** connector

The Y connector allows delivering medication without disconnecting feed. Y connector features nutrisafe2 connections:

- 2 male ports at the proximal end
- 1 female port at the distal end Priming volume: 0.44ml.

Code 368.42

Quantity box/case: 50/300

# ENFit<sup>TM</sup> nutrifit<sup>®</sup>

Safe enteral feeding systems for children and adults

ENFit / nutrifit FOR CHILDREN AND ADULTS

# Feeding tubes

#### **PVC** feeding tubes

Adapted for children and adults, the PVC nutrifit feeding tubes are intended to be used for short-term enteral feeding (up to 5 days) and feature the following characteristics:

- Made of PVC
- Closed distal tip with 2 lateral eyes (Fr 4 to Fr 12) and 4 lateral eyes (Fr 14 to Fr 21)
- Small cap with colour code to quickly identify the size of the tube
- Numerical markings every centimetre:
- from 5cm to 35cm for codes 364, 361 & 363
- from 5cm to 70cm for codes 366, 362, 312 & 390
- Radiopaqu
- Transparent to better visualize the administered solution.

#### **Extension tubes**

#### Standard extension tubes

These nutrifit extension tubes keep the feeding tube away from the syringe pump or from the feeding pump to improve the patient's comfort.

- Purple-coloured PVC extension tube
- Attached cap to close the tube and avoid contamination.

		Quantity			
Code	Length cm	Ext.Ø mm	Int.Ø mm	Priming vo- lume ml	Box/case
VZPRO90ENFIT	90	2.5	1.5	1.38	200/200

VZPRO150GDENFIT	150	4.2	3.0	9.9	200/200

#### **Extension tubes with clamp**

This nutrifit device gives extended connections to pumps and allows greater freedom of movement for ambulatory patients:

- Purple coloured PVC extension tube
- With Roberts clamp
- Attached cap to close the tube and avoid contamination.

		Quantity			
Code	Length cm	Ext.Ø mm	Int.Ø mm	Priming volume ml	Box/case
368.1071	100	2.5	1.5	1.9	45/270
368.1571	150	2.5	1.5	2.8	45/270

#### Extension tubes with lateral port

This nutrifit extension tube is designed with:

- Male ENFit connection at the proximal end
- Roberts clamp on the proximal section to interrupt the administration of enteral feed while the medication is injected in the lateral port
- Lateral port with male ENFit connection and attached cap
- Distal end with female ENFit connection and removable Christmas tree adaptor.

#### Extension tubes for gastrostomy button

These nutrifit extension tubes for gastrostomy make it possible to connect a nutrifit syringe or a nutrifit feeding pump set to a gastrostomy button for feeding or medication injection.

Two distal tips are available:

		Extension tubes for gastrostomy							
Code	Length cm	Ext. Ø mm	Int. Ø mm	Lateral port	Distal connection	Box/case			
0VENSPMCS3	30	4.1	3	No	Curved to 90°	4/40			
0VENSPMCS6	65	4.1	3	No	Curved to 90°	4/40

0VENSPMCY6	65	4.1	3	Yes	Curved to 90°	4/40			
0VENSPMDS3	30	6.1	4.7	No	Straight	4/40			
0VENSPMDS6	65	6.1	4.7	No	Straight	4/40			

#### Vented caps

Vented cap are used for nutrifit syringes (20 and 60ml) to enable gravity feeding and protecting the solution of enteral feed from contamination.

Code VZOPE20/60ENFIT Quantity box: 150

#### Sampling devices

#### **Drawing-up straws**

The nutrifit drawing-up straw is a device connected to a nutrifit syringe for medication sampling.

		Quantity		
Code	Length cm	Ext.Ø mm	Int. Ø mm	Box/case
817.057 or VZCAN5ENFIT	5	2.0	1.0	100/1800

VZCAN20GDENFIT	20	7.0	5.5	200/200

#### **Syringes accessories**

#### Caps for syringes

These caps are specifically designed for nutrifit syringes. Purple-coloured, it enables instant identification for enteral use.

Code	Packaging	Quantity box
828.017 or VZBOU1ENFIT	Individually packed	200
828.087 or VZBOU8ENFIT	Blister containing 8 caps	200

#### Bottle caps for sampling

These nutrifit caps secure the medicine bottle and allow the sampling with a nutrifit syringe.

ENFit / nutrifit FOR CHILDREN AND ADULTS

NON-SAFETY DEVICES

#### Cap for feeding tubes

Obturator cap for nutrifit feeding tubes.

Code VZBOUFENFIT Quantity box: 100

#### nutrisafe2 - ENFit adaptor

The nutrisafe 2 -ENFit<sup>TM</sup> adaptor is indicated for enteral use only. It enables the connection between a female ENFit<sup>TM</sup> connector (e.g. distal end of an ENFit<sup>TM</sup> administration pump set) and a male nutrisafe 2 connector (e.g. a nutrisafe 2 feeding tube). Priming volume: 0.10ml

Code 368.72

Quantity box/case: 100/1800

#### ENFIT - nutrisafe2 adaptor

The ENFit<sup>TM</sup> - nutri**safe**2 adaptor is indicated for enteral use only. It enables the connection between a female nutri**safe**2 connector (e.g. nutri**safe**2 syringe) and a male ENFit<sup>TM</sup> connector (e.g. a nutri**fit** feeding tube).

Prming volume: 0.25 ml

Code 0VEACC510 Quantity box: 300

#### 3-way stopcock

This nutrifit 3-way stopcock allows to deliver medication without disconnecting the feed. It incorporates a female nutrifit port to connect to nutrifit feeding tubes and 2 male ports.

Code VZROB3VENFIT
Quantity box: 200

#### **Y** connector

The nutrifit Y connector allows to deliver medication without disconnecting the feed. Y connector featuring nutrifit connections:

- 2 male ports at the proximal end
- 1 female port at the distal end.

Code 368.47

Quantity box/case: 50/300

## Funneled feeding tubes

#### **PVC** feeding tubes

#### Without weighted tip

The funneled PVC feeding tubes are intended to be used for short term use (up to 5 days) and feature the following characteristics:

- Closed or open tip
- Proximal end:
  - Small flexible funnel with cap with colour code for Fr 4 to Fr 10
- Large flexible funnel without cap for Fr 12 to Fr 21
- Numerical markings every centimetre:
  - from 5cm to 35cm for codes 310 & 311
  - from 5cm to 70cm for code 312
  - from 5cm to 75cm for code 391 and 390
- Radiopaque.

#### Polyurethane feeding tubes

#### Without weighted tip

The funneled PUR feeding tubes are intended for medium term use (1 to 4 weeks) and feature the following characteristics:

- Proximal end:
  - Small flexible funnel with cap with colour code for Fr 4 to Fr 12
- Large flexible funnel without cap for Fr 14 to Fr 21
- Double funneled connector and lateral cap for code 1381
- Numerical markings every centimetre:
  - from 5cm to 35cm for codes 1310 & 1311
  - from 5cm to 70cm for codes 1381 & 1391
- Radiopaque
- Transparent to visualize the administered solution.

#### Gastroscopy set

Designed for paediatrics and adults use, this feeding tube is placed with an endoscope. It is intended for medium-term use (1 to 4 weeks) and features the following characteristics:

- Made of PUR
- Closed distal tip with 4 lateral eyes
- No numerical marking as the length is adjustable
- Supplied with:
  - a male standard collar and a standard hub with metallic tubing + female cap
  - several connectors (Male Luer-lock/large funnel connector, male-male Luer-lock connector, taper connector/female Luer-lock) to adapt to the user's needs
- Radiopaque
- Transparent to visualize the administered solution.

This tray allows the placement of a catheter in the jejunum for patients presenting tumors in the mouth, pharynx, larynx, digestive tract or for patients who have been submitted to surgery in these organs, who cannot be fed by oral nutrition and when the placement of a feeding tube is impossible.

This jejunostomy tray contains:

- 1 fully radiopaque silicone catheter, length 60 cm  $\varnothing$  2.0 x 3.2 mm
- 1 Desilet introducer
- 1 Alene needle Fr 10
- 1 detachable compression hub (code 2196.30)
- 1 17G needle Length 98 mm
- 2 male Luer-lock/male Luer-lock connectors (code 893.00)

Code: 2300.00

Quantity box/case: 1/20

## Gastric aspiration

#### Faucher gastric tubes

The Faucher tube features a large diameter tube inserted through the mouth of the patient in the stomach for emergency suctioning and washout. It is used, for example, in the treatment of acute drug intoxication :

- Made of PVC
- Open tip with 4 lateral eyes
- Proximal end in Dry Natural Rubber Latex
- Numerical markings every 5 cm from 15 to 75 cm.

Code	Length cm	Fr	Funnel	Quantity Box
350.27	150	27	Straight	15

351.33	150	33	V-shaped	15
351.36	150	36	V-shaped	15

#### Dual flow gastric tubes

#### Without trap

The dual flow gastric tubes comprise a principal suction lumen with multiple eyes at the distal end and a secondary ventilation channel with a smaller cross section that communicates with the main suction lumen

A double taper adaptor is provided at the distal end of the main lumen to increase the choice of possible

For non-return valve preventing reflux from the lateral port, see page 70.

- Made of PVC or PUR
- Closed tip with multiple eyes
- Numerical markings every centimeter
- from 5cm to 45 cm for 6Fr & 8Fr
- from 10cm to 65cm for 10Fr
- from 10cm to 75cm for 12Fr and more
- Radiopaque
- Transparent to visualize the administered solution.

#### With trap: neosump

neosump is a dual flow gastric tube with a collection trap.

The tube comprises a main lumen for suction/decompression, while the secondary lumen remains open for ventilation. When a gastric sample is needed, the trap enables collection with accurate measurement of the volume aspirated from the stomach. An additional cap, supplied on the bottom of the trap, allows a safe transport of the sample. A double taper adaptor is provided to increase the choice of suction connections.

- Made of PVC
- Closed tip with multiple eyes
- Numerical markings every centimeter
- from 5cm to 45 cm for 6Fr & 8Fr
- from 10cm to 65cm for 10Fr
- Radiopaque
- Transparent to visualize the administered solution.

	Tube				Quantity

5382.08	60	8	6	35ml	25/100
5382.10	90	10	10	35ml	25/100

The trap is also available separately.

Code: 5534.91

Quantity Box/case: 25/150

#### Stylet for silicone feeding tubes

This stylet is designed to make a silicone feeding tube with closed tip slightly more rigid in order to facilitate its insertion:

- in stainless steel covered with a polyurethane sheath coated with hydrogel in order to increase its sliding properties inside the tube
- Proximal end made with an ABS cap in order to facilitate the handling
- Length: 130 cm

Code 2390.101: for 8 Fr to 10 Fr silicone feeding tubes with closed end. Code 2390.201: for 12 Fr to 21 Fr silicone feeding tubes with closed end.

#### Non-return valve for dual flow gastric tube

This non-return valve connects to the lateral port of dual flow gastric tubes (codes: 340/1340) in order to avoid any unintended gastric reflux.

Code	Material of the body	Material of the valve	Connection	Quantity
